# Margins and Insets

Kyle Sluder, iOS System Experience

# Title

Here's to the crazy ones. The misfits. The rebels. The troublemakers. The round pegs in the square holes. The ones who see things differently. They're not fond of rules. And they have no respect for the status quo. You can quote them, disagree with them, glorify or vilify them. About the only thing you can't do is ignore them. Because they change things. They push the human race forward. And while some may see them as the crazy ones, we see genius. Because the people who are crazy enough to think they can change the world, are the ones who do.

# Table Views

# Self-Sizing by Default

NEW

Link on iOS 11, all estimated heights default to `UITableViewAutomaticDimension`

Headers, footers, and cells use self-sizing by default

iOS only—behavior is not changed on tvOS

Ensure all views have sufficient internal constraints

Return fixed sizes from delegate methods

# Opting Out of New Behavior

NEW

Set table view estimated height properties to zero

Also disables self-sizing

```
override func viewDidLoad() {  
    tableView.estimatedRowHeight = 0  
    tableView.estimatedSectionHeaderHeight = 0  
    tableView.estimatedSectionFooterHeight = 0  
}
```

# Opting Out of New Behavior
